

Maine Crop Insurance Facts

December 2008

Risk Management Agency
Raleigh Regional Office

The Risk Management Agency offers a **federally subsidized crop insurance program** through private insurance companies. Crop insurance covers disasters such as drought, hail, frost, hurricanes, excessive moisture, fire, insects, plant disease and wildlife damage. This fact sheet only highlights certain features about various crop insurance programs and is not intended to be all-inclusive. You may contact your local crop insurance agent, or visit our website at <http://www.rma.usda.gov>, for more specific information about crop insurance in your area.

What Programs Are Insurable?

<u>Sales Closing Date</u>	<u>Crop</u>
May 1	Nursery
September 30	Forage Production
November 20	Apples
	Blueberries
January 31	Adjusted Gross Revenue
March 15	Adjusted Gross Revenue-Lite
	Barley (spring)
	Corn
	Forage Seeding (spring)
	Fresh Market Sweet Corn
	Green Peas
	Oats (spring)
	Potatoes
	Wheat (spring)
Continuous	Livestock Gross Margin Dairy

Sales closing dates are in place as the deadline to purchase an insurance plan for a particular crop. An application must be submitted to a crop insurance company representative by this date or else the insurance policy will not attach and your crop losses will not be covered.

What If I Have A Crop That Is Not Listed As Insurable?

You may still be eligible to request crop insurance through a *written agreement*. The written agreement is a document designed to provide crop insurance in counties without an established program for the crop or an organic crop. See your crop insurance agent regarding documentation requirements. Note, written agreements are not issued for pilot crops or catastrophic (CAT) policies.

Are Other Crops Being Considered?

Yes! The RMA is consistently developing new programs. Our agency is working with contractors, universities and researchers to identify local farmer needs and develop new crop programs. Maine currently has a pilot program for Adjusted Gross Revenue. Crops usually stay in a pilot program until the insurance plan is deemed fundamentally sound. Check with your insurance agent to see if a pilot crop is available in your county.

How Much Does It Cost?

A \$300 administrative fee, per crop per county, will apply for a Catastrophic (CAT) insurance plan. The premium on CAT coverage is paid by the Federal government. Catastrophic coverage pays 55 percent of the established price of the commodity on crop losses in excess of 50 percent. Limited resource farmers may have this fee waived. CAT coverage is not available on written agreements or crop revenue coverage. Check with your crop insurance agent to see if you qualify as a limited-resource farmer or for CAT availability.

Are Higher Coverage Levels Available?

Yes. The cost for buy-up levels of insurance coverage is a \$30 administrative fee, per crop per county, plus the premium. Simply select the amount of your Actual Production History (APH) yield you wish to insure; from 50 to 75 percent (for some crops in some areas, up to 85 percent).

Are There Other Types of Insurance Plans?

Yes! The agency offers different insurance plans.

- **Adjusted Gross Revenue:** This is a whole-farm insurance program providing insurance coverage for multiple agricultural commodities under one insurance product using income tax information from your operation. A farm report is created to determine coverage eligibility. Covered farm revenue includes income from most crops and agricultural commodities. A limited amount of income (not to exceed 35%) from livestock, animal products, and aquaculture products raised in a controlled environment may be covered. Under this plan, you can also cover revenue generated from commodities that are currently uninsurable (such as forage, fruit, and vegetable crops).
- **Adjusted Gross Revenue - Lite:** This program is a streamlined whole-farm revenue protection package that can be used as a stand-alone coverage or in addition to other individual crop insurance policies (except AGR). It allows you to insure a portion of the revenue generated from crops, animals (such as chickens, dairy cows, hogs and sheep) and animal products (such as eggs, milk, meat, and wool). Under this plan, you can also cover revenue generated from commodities that are currently uninsurable (such as forage, fruit, and vegetable crops).

- **Crop Revenue Coverage:** This plan provides revenue protection based on price and yield expectations by paying for losses below the guarantee at the higher of an early-season price or harvest price. Corn farmers can receive coverage under CRC.
- **Livestock Gross Margin Dairy:** This plan provides protection against unexpected declines in gross margin (market value of milk minus feed costs). It uses adjusted futures prices to determine the expected gross margin and the actual gross margin. Adjustments to futures prices are state-and-month specific basis levels.

Who Can I Contact For More Information?

The Raleigh Regional Office services Maine. Crop specialists are available to answer specific questions. Call or write the USDA/Risk Management Agency, Raleigh Regional Office, 4405 Bland Road, Suite 160, Raleigh, North Carolina 27609, telephone (919) 875-4880.
